As a Amazon user I should be able to login and logout with valid credentials	43	0	0	0	0	43	4	0	4	3m 21s 750ms	Passed

Feature As a Amazon user I should be able to login and logout with valid credentials

Scenario Login into the application with valid credentials

1m 21s 257ms

Hooks

Steps

Given I am on the Login page URL "https://www.amazon.in/"

Then I click on sign in button and wait for sign in page

Then I should see Sign In Page

When I enter username as "testusername"

And I Click on Continue button

And I enter password as "testpassword"

And click on login button

Then I am logged in

And I clear cart items if any

Then I choose Electronics>Headphones and headphones list out

Then I add first available headphone to cart

Then I search "Macbook pro" and add second available item to cart

Then I Select cart from home and remove the earlier added headphones

Then I Reduce the Quantity of the macbook pro product to one and proceed to checkout

And I Click on Sign out

Then I got log out from the application and land on sign in page
